**EDITOR'S NOTE:** The financial statements published above for the year 1942 are for the fiscal year from January 1st to December 31st if such reports were published; if not, they are for the nearest similar period. The Box Office Digest figures and statistics were compiled by NORMAN WEBB. The financial statements were furnished through the courtesy of E. F. HUTTON AND COMPANY, members of the New York Stock Exchange.

## STUDIOS HAVE BIGGEST PROFIT IN 1942

DESPITE WORLD WAR AND LOSS OF MANY FOREIGN MARKETS—PRODUCER-DISTRIBUTORS SHOW BIGGEST PROFIT IN PAST YEAR OF MANY YEARS — WITH NET PROFITS IN EXCESS OF \$53,000,000

The combined profits of the motion picture producing-distributing companies for the year 1942 with the exception of United Artists and Producers Releasing Corporation was actually \$53,216,488.00. To our recollection, this is the first time such a combined big net profit has ever been registered — which is undoubtedly the reason that motion picture stocks are very strong on the present bull market.

The statistics above give all of the net profits for the past six years, since The Box Office Digest has been on the press. The 1942 earnings are approximately \$17,000,000.00 more than the previous year; furthermore, the financial statements for the first quarter of 1943 are so strong that the net earnings for this year will probably be much in excess of \$60,000,000.00 — an all time high. This, of course, does not include the earnings of The United Artists Corporation, as the owners, Chaplin, Pickford, Fairbanks Estate, Korda, and Selznick split their own dividends and profits and issue no public financial statement.

Due to the boom in industry because of the National Defense Program, payrolls are much higher — which, of course, gives theatres more regular patronage at higher admission prices — and many two to six weeks hold-over engagements which naturally creates a much greater profit to the producer-distributor.
